

## Realizing your potential

Traditional approaches often provide an incomplete picture of what is really happening in the field as they fail to gather all of the necessary information and are prone to error. In some cases these problems may be further exacerbated when staff are constrained using rigid and inflexible tools that cannot quickly adapt to change. The end result is frustrated staff, underwhelmed customers and a lack of business intelligence.

Mobile Worker Plus can help you understand how Apps can help solve challenges very simply, whilst offering significant financial benefits. We not only improve your overall productivity but can help you work much more closely with your customers.

Our framework is designed with both field workers and management in mind and equips you with the capabilities needed to deliver a service to be proud of. At Mobile Worker Plus we have a mature and comprehensive portfolio of products covering aspects such as lone worker protection - Mobile Protect™, job/task management - Job Dispatch™ and incident reporting - Mobile Report™. All our Apps can integrate with existing 3rd party Apps and/or back-office systems and bespoke Apps can be created on the fly.

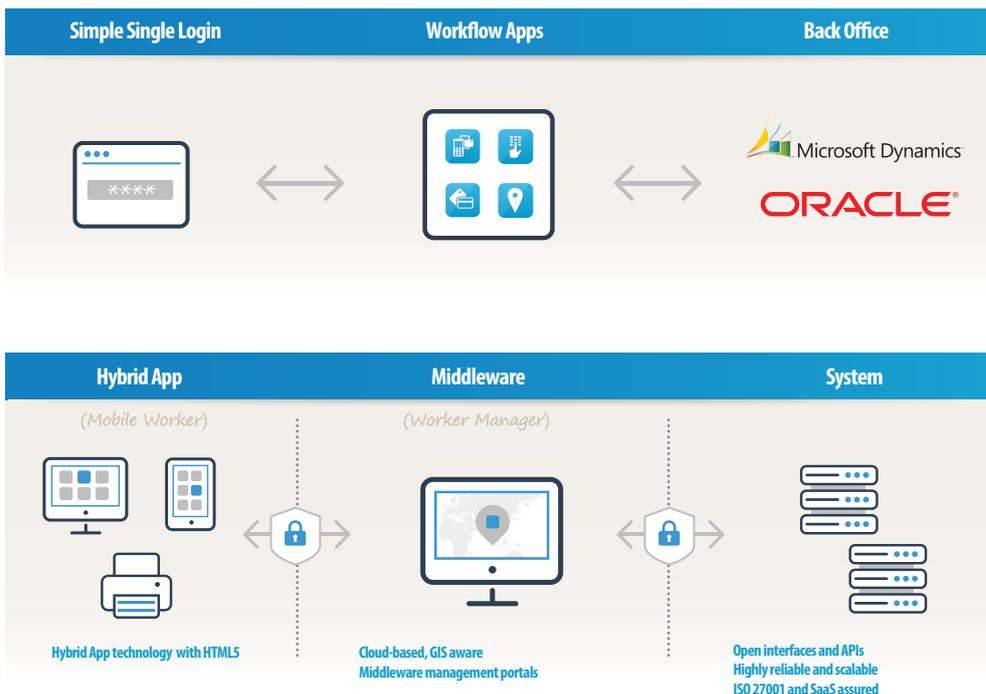

## Overview

Mobile Worker Plus is a software company specializing in Business to Employee (B2E) solutions focused on field worker safety, productivity and real-time reporting. We provide field workers with a single secure login via an App that opens up a number of activity based workflows (which we call "Workflow Apps").

Via mobile devices, field workers simply login once and are presented with a number of Workflow Apps that cover your organization's business requirements e.g issuing/payment tickets, reporting an incident, taking a survey and/or raising a lone worker alert.

We are one of the simplest, most customizable, multi-function solution available today and have proven case studies in some of the most regulated market sectors in the world.

Our flexible framework and large portfolio of Apps covers most standard uses and is agile enough to be tailored to cover any unique business process.

## Key benefits

1. Optimize field worker performance and efficiency resulting in more margin for your business
2. Simple single login with multi-function
3. Easy to use means reduced training costs and enthusiastic take up
4. Keeps the management team fully up to date with what's going on as it happens
5. Real-time agility and customization
6. Simple to deploy and not as costly as you may think

## What our clients say...

“ Mobile Worker Plus are a key partner providing us with an incredibly flexible platform that enables us to cost effectively mobilise complex business processes for our customers. Mobile ticketing, surveys, resource planning and payments are just some of the use cases covered which have been rolled out to some of the largest train operating companies in the UK. Mobile Worker Plus has proved to be an incredibly flexible and knowledgeable partner with proven support and delivery capabilities. ”

Heathrow  
Express

“ I am very pleased to have worked with Mobile Worker Plus. Our company got what we needed including the minute details. They have delivered as promised and have been very helpful with training and support. ”

“ We recommend Mobile Worker Plus to any business! They have carefully listen to our needs, gathered all the requirements and shortly came back with just the right product! We needed a solution that was easy to use, efficient and affordable! They went above and beyond our expectations! ”
