

## Security Patrol™

Sometimes you may find it difficult to ensure that security patrols are conducted properly at the required times. This can be particularly problematic when providing evidence to your clients that their sites have been properly monitored. If you are looking for a simple and paperless solution to overcome these and other challenges, then Security Patrol™ could be for you.

### What does Security Patrol™ do?

Security Patrol™ is an App which uses mobile device technology to provide tools and verify execution of patrols. Profiles can be easily created, activated and assigned giving you the flexibility to control your staff. A simple self-service management portal enables powerful operational control and auditing resulting in a feature-rich yet cost-effective system.

### Features of Security Patrol™

- Android App for smartphone and tablet: no special equipment is needed.
- Checkpoint processing to verify arrival at a configurable waypoint.
- Missed checkpoint reports with configurable reasons enabling the ability to retrospectively enter information on why a waypoint may have been missed.
- Reminder notifications to alert patrollers if checkpoints are pending for the patrol.
- Tracking to understand where your patrollers are at any given time.
- Checklists with configurable items that can be displayed to patrollers whilst working a route.
- Automated reporting sending reports to managers and/or customers detailing coverage and performance.
- Geofence support where alerts are generated if users enter or exit pre-defined zones, offering greater security.
- Two-way messaging for accurate and secure information exchange and real-time communication.
- Comprehensive event auditing enabling post incident analysis and review.
- UK business day software support as standard with optional 24/7 support.

### Benefits of Security Patrol™

- Ability to provide evidence based automated reports to customers proving their sites have been patrolled.
- Major productivity savings with respect to using standard mobile device technology and automated report generation.
- Web-based, hosted and self-service resulting in low cost of ownership and operational cost.
- Easily extendable with flexible architecture enabling rapid creation of new services as you want.

### Why Mobile Worker Plus?

Mobile Worker Plus is a software company specializing in Business to Employee (B2E) solutions focused on field worker safety, productivity and real-time reporting.

With a strong background in Mobile and Apps we have been working with a wide variety of customers across multiple market sectors since 2005. Our flexible framework and large portfolio of Apps covers most standard requirements and is agile enough to be tailored to cover any unique business process. We are committed to continually evolving and working with our partners to ensure relevance in what is becoming a more connected and automated world.
